

For Immediate Release:

Alpha Resources Expands Product Offerings *Now Offers More Metallography Options*

Stevensville, Michigan, October 29th, 2024 – Alpha Resources LLC, the leading manufacturer of consumables and reference materials, has recently expanded their product offerings to include additional metallography products.

The study of the microstructure of all types of metallic alloys, metallography specimen preparation includes a series of specific steps: documentation, sectioning and cutting, mounting, planar grinding, rough polishing, final polishing, etching, microscopic analysis, and hardness testing. Alpha's metallography product line is used in mounting, rough polishing, and final polishing for metallographic specimens. Alpha offers metallography supplies for grinding (abrasives), diamond polishing, mounting, polishing cloths, and sectioning.

Alpha's metallography product expansion includes more than 100 new options for abrasive options and polishing cloths. The polishing cloths additions included more backing options and cloth types. Abrasive options include more sizes and more grit choices for different grinding needs.

"One of Alpha's 2024 customer goals was to expand our consumables offering, allowing our customers the convenience of using a single trusted source for high quality consumables – regardless of brand or analysis type," states Ken Mantei, Director of Operations, at Alpha Resources. "Alpha has offered metallography supplies for more than 20 years, but a recent review of our customer needs has led us to expand the number of options available in our metallography line. Like all Alpha products, the new metallography options offer a savings to customers while providing high quality to consistent, reliable results."

Additional information about Alpha's expanded of line of high-quality metallography supplies may be found on the website, <https://alpharesources.com/-metallography.php>

About Alpha Resources

Founded in 1978, Alpha Resources, LLC is a global leader in the manufacture and distribution of consumables and certified reference materials for use in atomic spectroscopy analysis. Alpha Resources is ISO17034, ISO17025, ISO9001:2015 certified.
